Wealth Insights

By Shomit Sirohi

I. What is a wealth insight?

Something that seems wealthy, or like a pure wealthy object or custom.

II. Creativity

Many creative people exist, but wealth and creativity is a different insight.

III. My Company – Sirohi

I list at least 100 inventions, and creative aspects of living architecture and curation which then is a number of creative wealth insights.

IV. Banking

I also mean banking I do is wealthy. Like an American Express credit card.

V. A Contrast

Normally companies have wealth insights which are about just their software or model of car. It is not this complex a wealth insight.

VI. Quoting McShull

“When a wealthy car is produced, it produces a company model around that car. Sirohi has so many wealth insights that he is the wealthiest man, even if he was on the street and using a credit card. The point here, is wealthy insights, like a certain champagne for normal people, or a certain Jim Beam rum for others, for him a old Viejo Havana Cliub, or in fact a Kingfisher malt beer which is chilled. See the wealth insight into this. It is a quality which is like his chosen spaghetti, not a normal pasta of say penne. But his chosen quality goes higher than his cheap Dirubhai habits, he has an idea of coastal Spain living tourism. Normally people go to Paris. This then is truly qualitative wealth – something like the difference between him and a person who is rich. It translates to pure wealthy lifestyles. It just means he will give an idea, like hotel living. And will live in hotel style. When a crisis occurs, it cannot be real he should say, because crisis is a simple basic model company with zero ideas on creative wealth planning. Plan my wealth – it appears like a man in a Lufthansa going for symphony of the highest Werkmeister. If you get into the recent crisis spent joking with Bill Gates, it is Sirohi wondering how his wealth is being planned, he means he is a genius who is about use-value a lot, he means his use-value should have no problems.”

VII. Statistics

Quoted from a magazine like Forbes –

Usual wealth style statistics is about 70 percent on wealth insights given to Ferari. Sirohi is not listed yet, because he is not a well known capitalist but a well known Communist, he is at an easy 100 percent.

In the actual Forbes, Ferari is now at number 1. Earlier at 30 and who was at number 1, Dirubhai and Mukesh Ambani.

Sirohi is easily at number 1 and is why he influences Ferari to be number 1.
